Full-Stack Developer

Developed a responsive web application using React.js, Node.js, and Firestore to streamline client onboarding. Conducted code reviews and implemented best practices, improving overall code maintainability.

PROJECTS

Invoice App

React (Vite), Node.js, Express, MongoDB Nov '25 - Nov '25

2-Tier Application Deployment Using Docker

- Designed and deployed a scalable 2-tier containerized architecture using Docker, separating application and database layers
- Enhanced system security by leveraging Docker Swarm to facilitate **secure inter-container communication**
- Containerized a Next.js application and MongoDB with optimized multi-stage Docker builds to reduce image size, improve performance, and enhance scalability and security.

Photoshare | Full-Stack Event Photo Selection Platform

React (Vite), Node.js, Express, Google Drive API, OAuth2, JWT, Vercel

https://selectyourphoto.vercel.app | https://github.com/Editorhacker/Photo-Share

- Built a full-stack platform where photographers share event photos and clients pick favourites, so final albums use only client-chosen shots.
- Developed a responsive React gallery with multi-select and shareable links, no client signup needed.
- Designed Node.js/Express REST API with Google Drive integration and OAuth2 + JWT auth; fixed `invalid_grant` errors and a concurrency bug to keep auth reliable under simultaneous requests.
